Footer Information

## Frame Image

Find images for top header, content holder and bottom footer like this picture frame and moulding.

## Moulding Image

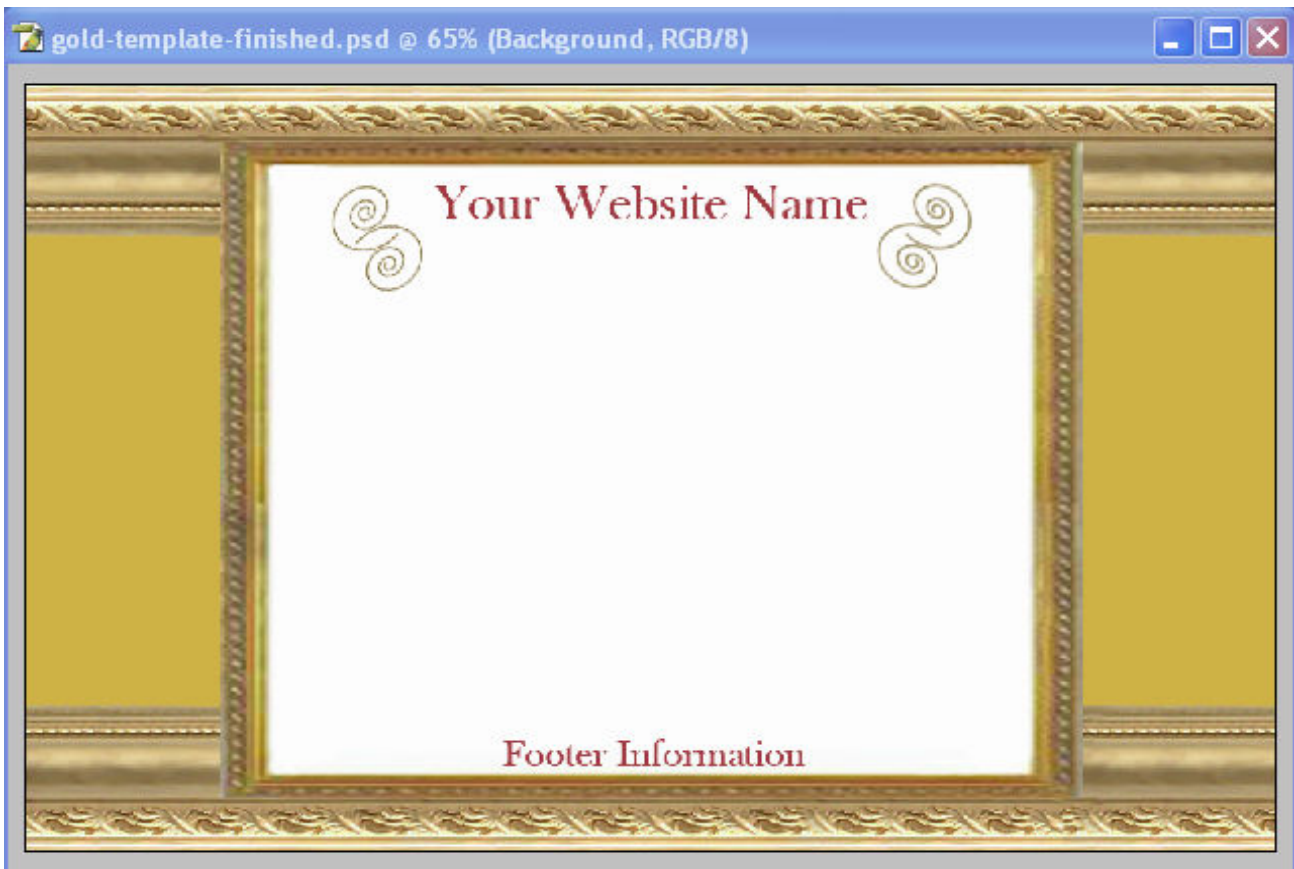

Paste top image width of site (ex. 950 px)  
Use smudge tool to blend seams & flatten layers

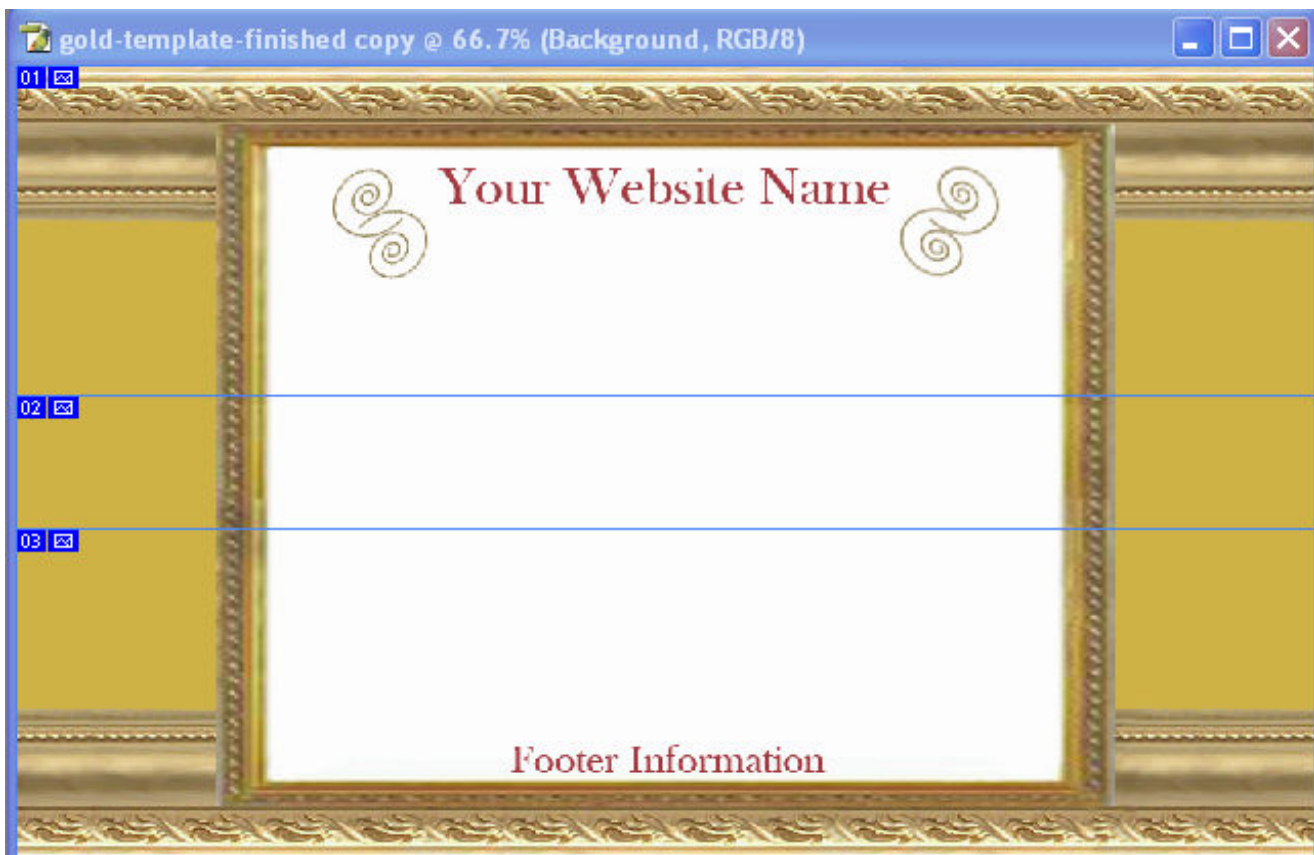

Duplicate layer and rotate upside down

Layer frame image on top, add text and spirals.  
Color space on either side of content holder.

Slice into 3 gif images

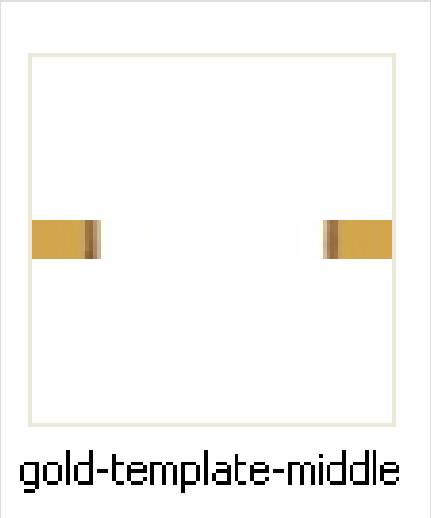

# Save for the web as 3 separate gifs
